

East Asian Cities

Population 1,081,703,793

imb/ EAST ASIA

The new face of East Asia is found in its cities. East Asian cities are filled with the most modern skyscrapers in the world, parks, high-rise apartments, cars, and a mushrooming population.

Wealthy urbanites and a growing middle class spend millions on vacations, name-brand products, and sending their children abroad to the best schools. Many have yet to seriously consider their eternal destiny.

Sharing the gospel with urbanites has various challenges. Many work long hours and make long commutes on public transportation. Caught up in a frenzy of work and play, they just don't have time to talk. Most urbanites would say they don't have time for worship, Bible studies, or even socializing with friends.

PRAY for rural villagers who move to the cities for a better life, only to find they are looked down upon as second-class citizens. Pray they find their value in Christ.

PRAY for urbanities to be awakened to their need for something more than fleeting riches and the best the world has to offer.

PRAY for churches to be established among all societal segments of the city, reaching the millions who live there and bringing them out of darkness.
